

Cost and Track Projects Quickly, Accurately and Effectively

The UNISON Job Cost Management module makes tracking projects a much more organized and simpler process. Its flexibility allows you to set up all the cost tables required for any job. UNISON can store all of your budgeted and estimated charges for artwork, paper and labor costs.

Single Point Invoice Entry

Invoices are only entered once in Accounts Payable and are then interfaced to the Job Costing functions.

Summary Cost Information for Production and Financial Analysis

UNISON offers the ability to review estimates versus actuals and production efforts for each job and, then compare these to other projects. This is an invaluable management tool.

On-line Project Status

You are always just a few keystrokes away from obtaining a precise picture of all projects at any given time.

Budget Analysis

UNISON gives you a view of budget versus actual information to improve project management and accountability. The system also provides two budgets at the detail level for each project. These tools are designed to help you make more educated and timely decisions.

Cost Comparison

As invoices come in from vendors and are processed via Accounts Payable, project information is automatically captured by UNISON for cost comparison between actual and estimated figures.

Cost and Track Projects Quickly, Accurately and Effectively

With UNISON...

- ✓ Cost, Subcost, Type of Cost, Budget and General Ledger Tables are set up and maintained by the user, providing flexibility in associating specific cost and subcost categories with the General Ledger accounts.
- ✓ Open products are selected by Publication Group, representing all of the products due for completion during the current month. For each record, the operator has the option of reviewing the Job Cost Master Table detail data, updating the Final Unit Cost or calling the next record without any updating being performed.
- ✓ With unlimited user-defined budget templates data input errors are reduced and budget entry time is decreased.

Access Information

- | | |
