

Superior Software for Simplifying Royalty Processing Complexities

The UNISON Royalty Processing module is designed to meet the demands of publishers. This system offers great flexibility to effectively address unique and detailed requirements. User-defined settings mean that you can match system functionality to your current business model.

Statement Processing with Many Options

Producing statements with UNISON is a quick and accurate process:

- Ability to Select and Print by Royalty Frequency
- Definable Minimum Check Amounts
- Combine Titles on Statements
- Display All Royalty Statements for Instant Status Information

Automatic Transfer to Accounts Payable

UNISON is a fully integrated system. This means that Royalty Processing can automatically transfer all payable data to Accounts Payable for the preparation of checks. Eliminating the re-keying of data saves time and reduces the chance of error.

Instant Access

UNISON puts royalty data at your fingertips. Standard reports and displays show accurate, up-to-date information.

Easy Contract Generation

UNISON makes contract development fast and easy. The system will guide you through the process of creating a new contract. Built-in prompts such as item codes and royalty categories ensure that accurate data is input. Automatic calculations and percentage record generation eliminates tedious data entry.

Superior Software for Simplifying Royalty Processing Complexities

With UNISON...

- ✓ The *Royalty Cut Off Update* program is used to cut off sales information at the end of a period, and to move this information into the Saved Royalty Transaction File records. This allows the daily billing process to continue creating Royalty Transaction File records for the new period without combining them with the sales from the previous period.
- ✓ Flexible calculation methods can be based on Type of Sale, Calculation Method, and Break Levels.
- ✓ UNISON offers the ability to re-run the *Royalty Update Program* if necessary, to input, update or correct contracts, or to post additional sales or credits.
- ✓ A full breakdown of an account can be viewed using the Statement Displays.
